

SHRAWAN KUMAR KUMAWAT

Data Scientist | AI/ML Engineer | Generative AI Engineer

+91 7891763203 | shrawan662000@gmail.com | Gurugram (India) | linkedin.com/in/shrawan-kumar-kumawat

PROFESSIONAL SUMMARY

Data Scientist with 3+ years of experience building and deploying production-ready AI/ML and Generative AI solutions across telecom, finance, talent acquisition and enterprise domains. Experienced in predictive analytics, Agentic AI, RAG systems, conversational AI, and LLM-powered applications, with end-to-end ownership from model development to production deployment. Proven track record of delivering scalable AI solutions that drive customer retention, operational efficiency, and business impact.

SKILLS & TECHNOLOGIES

Programming Languages : Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn), SQL

Frameworks & Libraries : FastAPI, Flask, PyTorch, TensorFlow, Speech-to-Text (STT), Text-to-Speech (TTS)

Machine Learning : Statistics (Hypothesis Testing, A/B Testing), Data Analysis and Visualization, Regression, Classification, XGBoost, CatBoost, Random Forest, Support Vector Machines (SVM), Clustering, Recommendation Systems, Natural Language Processing, Text Classification, NER

Deep Learning : Artificial Neural Networks (ANN), Convolutional Neural Networks (CNN), Recurrent Neural Networks (RNN), LSTM, GRU, Transformers, Fine-tuning (LoRA, QLoRA)

Generative AI : Large Language Models (LLMs), OpenAI, Gemini, Claude, Groq, Prompt Engineering, Retrieval-Augmented Generation (RAG), Vector Databases (FAISS, ChromaDB, Pinecone), Embedding Models, Hugging Face, LangChain, Agentic AI (LangGraph, CrewAI, Autogen)

Cloud Services : Azure AI Foundry, Azure OpenAI, Azure AI Search, Azure ML, Azure App Service, AWS Lambda, S3, EC2, ECS, SageMaker

MLOps & Deployment : Docker, MLOps, MLflow, CI/CD Pipeline, Git, GitHub Actions, Model Registry, Model Evaluation, Monitoring

WORK EXPERIENCE

Lycatech Services Pvt Ltd | Data Scientist

Oct 2025 – Present | Chennai, India

Telecom Customer Churn Prediction

- Built churn prediction models across 14 telecom markets using XGBoost (benchmarked against Logistic Regression, Decision Trees, SVM), achieving 88% recall / 72% precision in flagging high-risk customers.
- Engineered scalable ETL and ML pipelines processing millions of telecom records, supporting real-time analytics, model serving, and production AI applications.
- Enabled targeted retention initiatives that saved ~40% of at-risk accounts and drove +1.2M EUR revenue growth through proactive churn management.
- Deployed the best-performing model using MLflow for experiment tracking and model registry, with automated CI/CD pipelines to AWS ECS (Fargate), enabling scalable, reliable, and production-grade model serving.

LENS – Network KPI Intelligence Assistant

- Designed and developed an LLM-powered RAG assistant for Mobile Network Operators (MNOs) with Text-to-SQL capabilities to analyze network KPIs, cell-site performance, alarms, customer experience metrics, and structured telecom data.
- Implemented a LangGraph-based multi-agent AI system for Root Cause Analysis (RCA), anomaly detection, and network performance diagnostics, reducing manual investigation time and enabling faster issue resolution.
- Built multi-turn conversational workflows with dynamic retrieval and Text-to-SQL query generation across telecom data sources, enabling engineers to investigate KPI degradations, faults, and receive context-aware recommendations.
- Containerized and deployed the AI assistant on AWS Fargate using Docker and automated CI/CD pipelines, enabling scalable, highly available, and production-ready deployments.

Velocitai Digital | Data Scientist

Mar 2025 – Oct 2025 | Gurgaon, India

Vhire – AI-Based Hiring Platform

- Designed and deployed a voice-enabled AI interview platform — live at <https://app.vhaire.com> — leveraging STT (Speech-to-Text) and TTS (Text-to-Speech) with LLM-powered workflows, conducting 100–150 live interviews daily in production.
- Built adaptive assessment workflows with contextual follow-up questioning to evaluate candidates across technical and non-technical domains, reducing manual screening effort by 70%.
- Implemented AI-based interview proctoring with face monitoring, head-pose tracking, and cheating detection, improving interview integrity and delivering automated candidate evaluation reports.
- Designed role-specific question banks and multi-round interview flows, supporting data-driven hiring decisions and cutting time-to-hire through fully automated feedback workflows.

SAG Infotech | Data Scientist

Mar 2024 – Mar 2025 | Jaipur, India

Multilingual Agentic Corrective RAG Customer Support Chatbot

- Engineered a multilingual, voice-enabled customer support chatbot using Corrective RAG (CRAG) architecture across 8 Indian languages, integrating OpenAI Whisper for speech recognition.
- Designed a multi-agent LangGraph workflow leveraging semantic retrieval, query rewriting, relevance scoring, and corrective retrieval, triggering knowledge refinement or external search when confidence was low.
- Improved response grounding, accuracy, and customer support resolution efficiency by 60%, reducing escalation rates and average handle time.

Sentiment Analysis & Customer Feedback Classification

- Developed a scalable NLP pipeline to classify customer reviews into Promoter, Passive, and Detractor categories based on NPS ratings, benchmarking multiple ML and deep learning models to achieve a 92% F1-score.
- Engineered multilingual sentiment analysis models using transformer-based architectures (BERT/XLM-RoBERTa), enabling robust text classification across diverse language datasets.
- Deployed the sentiment classification model as a FastAPI-based inference microservice on Azure App Service, enabling scalable, highly available, and real-time inference for downstream business applications.

Celebal Technologies | Associate Data Scientist

Apr 2023 – Dec 2023 | Jaipur, India

Email Automation Bot

- Developed an AI-powered email automation solution using Azure OpenAI GPT-4, few-shot prompt engineering to classify incoming emails and generate context-aware responses, improving processing efficiency by 40%.
- Built real-time email classification and response generation workflows, reducing response time by 75% and saving support teams 30+ hours per week through intelligent automation.
- Deployed the FastAPI application on Azure App Service with automated CI/CD pipelines, enabling scalable, secure, and highly available production deployments.

EDUCATION

B.Tech – Computer Science & Engineering (Specialization: Artificial Intelligence & Machine Learning)

2019 – 2023

University of Engineering & Management, Jaipur, Rajasthan | CGPA: 8.2 / 10.0

CERTIFICATIONS

- Microsoft Azure Data Scientist Associate (DP-100)
- AWS Certified Machine Learning Engineer
- IBM Certified – Machine Learning with Python
- Python for Data Science – NPTEL, IIT Madras
